Portable Magnet Milling Machine JSM1300

The Portable Milling Machine is a three axis portable milling machine provides precise and versatile on the job milling capabilities .It is designed to be attached either to the workpiece or to the support structure beside it.The machine is used for milling large cumbersome parts many customers use this machine when welding up and remachining worn parts on production machinery like stamping presses. Long motor mount slots are easily machined often without dismantling since the milling machine can be mounted right on the workpiece .Motor mounts and pump bases are easily machined especially in tight locations . A small Panel is supplied which houses the Feed and Magnets controls

Technical Specifications

X stroke 1400- mm LM Guides with double nut ball screw

Y Cross stroke 280mm LM guides with ball screw

Z Stroke 120mm with regular screw

Spindle Power Hydraulic 6.5 Hp capable of milling a 150 mm dia face mill

Feed Motor 1 Hp Geared DC Motor ball screw

Spindle Taper ISO 40

Machine mounting option 16 holes are provided of dia 14 at a pitch of 120mm to mount the machine securely and rigidly also provided is 6 nos of electromagnets for electromagnetic clamping .Machine supplied with 6.5 HP Hydraulic motor 32 LPM max cutter speed 375 Rpm machine supplied with power pack to suit above hydraulic motor

Manufactured By

Jinsha Machines

F12 Bashweshwar Industrial Estate

Vishweshwar Chowk PCNDTA
